

Google Colaboratory: An Introduction

What is it?

- Google recently released its internal tool for collaborating on machine learning and research.
- The project called Google Colaboratory (g.co/colab) is based on the Jupyter Open Source Project and is integrated with Google Drive.
- Colaboratory allows users to work on Jupyter Notebooks as easily as working on Google Docs or spreadsheets.

What does it support?

- Jupyter Notebook Environment
- Python 2.7 & Python 3.6
- Tensorflow Built-In
- Free GPU Support (*12hr limit)

Live Demo
